CONTENTS TO VOLUME 19

COMPUTATIONAL PHYSICS

Issue	*Page*	
1	vii	Editorial. K.V. Roberts
1	1	Computer Physics Communications instructions to authors (third revision).
1	11	The CPC Program Library. C. Jackson
1	17	An improved deconvolution method for bremsstrahlung spectra from hot plasmas. K. Bernhardi
1	23	A Numerov-like scheme for the numerical solution of the Schrodinger equation in the deep continuum spectrum of energies. L.Gr. Ixaru and M. Rizea
1	29	Growing lattice animals and Monte Carlo methods. G.R. Reich and P.L. Leath
1	35	The number of computers in a non-hierarchical system for tokamak data processing. A. Ogata and K. Yuasa
1	43	Linkage of Fortran programs with partitioned data sets on IBM, CDC and DEC computers. J.R. Comfort
2	161	An algorithm to compute the vacuum contribution to the ideal MHD dW in an axisymmetric configuration. F. Troyon, L.C. Bernard and R. Gruber
2	171	Nonuniform grid generation for boundary-layer problems. A.K. Agrawal and R.S. Peckover
2	179	Convergence of solutions of the MHD stability code ERATO. T. Tsunematsu, T. Takeda, T. Matsuura, G. Kurita and M. Azumi
2	185	A new fourth-order method for $y'' = g(x)y + r(x)$. J.P. Coleman
3	273	Report of the IAEA consultants' meeting on computer codes for fusion research, 5-7 December 1979, Vienna, Austria. J. Killeen (Chairman)
3	293	Diagrammatic many-body perturbation expansion for atoms and molecules: V. Fourth-order linked diagrams involving triply-excited states. S. Wilson and V.R. Saunders
3	299	Computational methods for eikonal differential cross sections. J.E. Miraglia, R.D. Piacentini and R.D. Rivarola
3	305	Method for obtaining small sets of pseudo random numbers with uniform distribution. C.A. Ribeiro
3	309	MHD-calculations for cometary plasmas. H.U. Schmidt and R. Wegmann

COMPUTER PROGRAMS IN PHYSICS

Issue Page

1 51 Implementation of the partitioned-data-set concept for CDC computers. J.R. Comfort

1 63 Algorithm for the first order hydrostatic ellipticity of a planet. W. Moon

1 69 Calculation of photoemission spectra for surfaces of solids. J.F.L. Hopkinson, J.B. Pendry and D.J. Titterington

1 93 A computer program for determination of nuclear parameters from internal conversion experiments. M. Rysavy and O. Dragoun

1 103 ASYPCK: a program for calculating asymptotic solutions of the coupled equations of electron collision theory. M.A. Crees

1 139 EDITOR: a program for amending files of card images. M.A. Crees

2 197 Nuclear decay scheme construction based on qualitative coincidences. L. Hlavaty

2 205 Folded Yukawa-plus-exponential model PES for nuclei with different charge densities. D.N. Poenaru, M. Ivascu and D. Mazilu

2 215 P3M3DP: the three dimensional periodic particle-particle/particle-mesh program. J.W. Eastwood, R.W. Hockney and D.N. Lawrence

2 263 A program for calculation of the reflection and transmission of electrons through a surface potential barrier. G. Malmstrom and J. Rundgren

2 271 Erratum notice. Program ACQN to calculate transport collision integrals adapted to run on IBM computers. P.D. Neufeld and R.A. Aziz

2 272 Erratum notice. A plotting package for visually comparing theoretical and experimental results. J. Anderson, R.C. Beckwith, K.J.M. Moriarty and J.H. Tabor

3 327 Subroutines for the evaluation of exchange integrals in the impact parameter formulation of atomic charge transfer collisions. C.J. Noble

3 337 A program to introduce local symmetry in ab initio computations of molecules: IBMOL-7. E. Ortoleva, G. Castiglione and E. Clementi

3 359 EDWIN: a program for calculating inelastic molecular collision cross sections using the exponential distorted wave and related approximate methods. G.G. Balint-Kurti, J.H. van Lenthe, R. Saktreger and L. Eno

3 377 Numerical solutions of the Boltzmann transport equation. S.D. Rockwood and A.E. Greene

3 395 Erratum notice. An expansion equation of state subroutine. K. Morgan
